

ACUMÉ FORENSIC

TECHNOLOGY DESIGNED FOR LEGAL INDUSTRY PROFESSIONALS BY LEGAL INDUSTRY PROFESSIONALS.

'REVIEW' Conceived as a result of a Government R&D partnership with a UK University and Acumé Forensic.

A unique evidence exploration and presentation system that integrates material generated during the investigative life cycle. Designed for information to be examined, classified, amended, disseminated and presented at trial all in one product. Incorporating many automated tools including ingestion and identification of documents and multi media.

With inbuilt extensive research tools renaming and tagging material for further research or service. All in one with an intergrated trial presentation tool with full trial audit function negating the requirement for any third party intervention.

A simple to understand interface ensures speedy understanding of all functionality reducing the need for product training.

'REVIEW' tried and tested in UK and International High Cost and Very High Cost Cases by UK prosecuting agencies.

'REVIEW' links seamlessly with tablets to hold jury bundles for use in trials. The same software package is utilised in a portable package 'REVIEWLITE' allows Jurors and Court professionals to use the same software, but designed for trial purposes to

'REVIEW' features include but are not limited to:

- High security specification.

- Automated ingestion from scan or electronic media with ingestion checker capability.

- Machine learning with automated identification of document types and names.

- Full edit functions for file names, types and all other relevant information.

- Pagination and OCR on input.

- Extensive search capability.

- User interface to customise requirements from software.

- Create user defined fields.

- Review most formats of media in one place from documents to video.

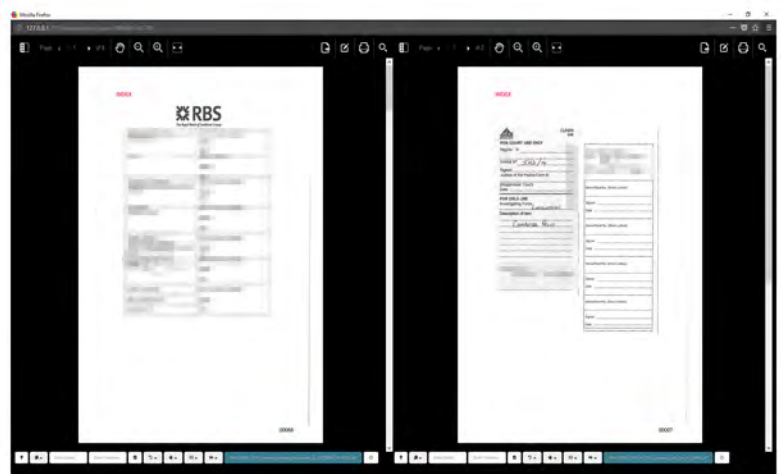

- On line version allows multiple user log in, full administrator control and multiple cases in one place.

- Use agreed file naming protocols to automatically identify and link between documents

- Extensive search capability.

- Generate reports linked to documents.

- Unique trial module designed to present at court or tribunal.
