OFFICIAL

DELIVERING INFRASTRUCTURE AS A SERVICE (IAAS)

Carrenza's OFFICIAL IaaS Cloud is a secure cloud service that supports digital transformation, transactional systems and legacy environments.

Carrenza is a Cloud Managed Services provider who believes technology should make it easier for Public Sector organisations to deliver better citizen services.

We blend IaaS and PaaS capabilities to transform how our customers and partners consume and deliver applications. We are proud to count Government Digital Services and Public Health England amongst the organisations that rely on us to deliver their business-critical applications.

OUR WORK INCLUDES

PUBLIC HEALTH ENGLAND
GOVERNMENT DIGITAL SERVICE
DEPARTMENT FOR WORK AND PENSIONS
CABINET OFFICE

DEPARTMENT OF HEALTH
MINISTRY OF JUSTICE
HS2

CARRENZA ON G-CLOUD

- Support for OFFICIAL and OFFICIAL-SENSITIVE workloads
- Platform services to support deployment of applications
- Automation to simplify processes and reduce cost
- Easy to scale
- Build new services in secure UK sovereign environments
- Support for legacy workloads to reduce cost and internal data centre footprints
- Working through partners our services are also available to procure via the Technology Products (RM1054 & RM3753) and Technology Services (RM1058 & RM3804) frameworks.

We work with:

Legal Aid
Agency

WHO WE WORK WITH

Along with public sector organisations, we also provide industry-leading IaaS solutions to financial services, retail and Software as a Service (SaaS) markets.

Our services are enterprise-ready and will support any x86-based workload. We are proud to boast an excellent record in terms of reliability; with infrastructure SLA's at 99.99%.

Customers engage with us because of the innovative way we deliver cloud services, whilst focussed on:

- Infrastructure automation
- Ability to deploy servers in minutes
- Automate application development cycles
- Utility-based pricing with per hour billing if required
- Flexible commercial terms based on budget and not resources
- Choice of virtual and bare metal resource

WHY CUSTOMERS CHOOSE CARRENZA

We work with organisations to deliver applications and workloads across a mix of cloud platforms. Organisations choose us because of the unique way we deliver services with a high level of customer support.

We also support:

Department
for Work &
Pensions

Ministry
of Justice

Public Health
England

Our partners include:

HPE
SolidFire (NetApp)
Equinix
VMware
Microsoft
ARK Data Centres

A MULTI-CLOUD APPROACH

Key features of our multi-cloud service include the unique automation pipeline, which is able to greatly improve the process of deploying services into any cloud.

CARRENZA CLOUD PLATFORMS

	INTERNET CONNECTIVITY	PSN & HSCN CONNECTIVITY	HYBRID: DIRECT CONNECT FROM CARRENZA	ONLY UK DC'S	SC CLEARED SUPPORT TEAM	UK BASED SERVICE DESK & SUPPORT	Overview	Use Case
VMware	Y	Y	N/A	N/A	Y	Y	Our award winning community cloud is delivered using vCloud with full portal and API access.	For both new digital, current, and legacy application workloads.
OVM	Y	Y	N/A	Y	Y	Y	Our Oracle X86 utilising the same infrastructure as our VMware cloud and Oracle's Virtual Manager hypervisor.	A platform specifically designed for platform for Oracle based applications and databases
SPARC	Y	Y	N/A	Y	Y	Y	Our Oracle SPARC cloud is designed to help springboard customers to the cloud, meaning customers can leverage the benefits of cloud now whilst undertaking digital transformation and their own pace.	For non-X86 Oracle based workloads, ideal for quickly and easy moving away from on-premise hosting and unwieldy legacy contracts.
AWS	Y	Y*	Y	-	Y**	-	AWS with support from Carrenza, from consolidated billing to full service design and management	New digital workloads as part of a wider AWS strategy. Perfect where data sovereignty and certain security requirements are not critical or restrictive.
Azure Stack (Sapphire)	Y	-	N/A	Y	Y	Y	A hybrid cloud service delivered from Carrenza's managed Azure Stack cloud that connects to Microsoft Azure's public cloud regions.	Microsoft workloads where you want the functionality of Azure but the security, data sovereignty, and service wrap from Carrenza.
Microsoft Azure	Y	Y*	Y	-	Y**	-	Microsoft Azure with support from Carrenza, from consolidated billing to full service design and management.	New digital Microsoft based workloads. Perfect where data sovereignty and certain security requirements are not critical or restrictive.

Y* = based on availability and connectivity from vendor

Y** = potentially some but to be clarified with the vendor

APPLICATION HOSTING AND PERFORMANCE MANAGEMENT

Through our parent Six Degrees we are the UK's largest hosting provider for Microsoft Dynamics AX ERP, specialising in delivering application performance management, monitoring, reporting and security. Our expertise also extends to Dynamics CRM, Dynamics 365, Infor SunSystems and Oracle's JD Edwards EnterpriseOne application suite. We can also help you if you have any other ERP, CRM, financial management or other mission-critical application that is SQL-based.

UNIFIED COMMUNICATIONS (UCaaS)

Through our parent Six Degrees our UCaaS offering, in partnership with Avaya, has been designed to enable UK-based organisations to access voice, video and collaboration tools on virtually any device. The hosted service, which scales to 2,500 users across 150 sites, utilises our carrier-grade SIP platform and business continuity capabilities (we run carrier grade Genband and Telsis voice switch networks which enable us to offer market-leading availability times for all UC services).

Organisations benefit from the exact same capabilities they would receive with an on-premise deployment of the Avaya platform, with the added security of knowing that their voice estate is replicated and can be instantly rerouted as part of a business continuity plan.

About us

Carrenza is a cloud managed services provider that blends IaaS and PaaS capabilities to transform consumption and delivery of applications. We are proud to count Department of Work and Pensions, Royal Bank of Scotland and Government Digital Service amongst the organisations who rely on us to deliver their business-critical applications.

Over the years we have received a number of awards in recognition of our commitment to our clients, and our agile approach in adopting new technologies.

We have built strong relationships with Microsoft Azure, AWS, HP and VMware; and these affiliations go much deeper than traditional partnerships – we run systems that challenge their technology.
